

# STEEL ROOFING - DO IT RIGHT FIRST TIME - ONE TIME

*"Z200 (brand name omitted) pre-painted galvanised steel is not recommended for application in marine environments or exposure to industrial environments. Z275 is recommended for these areas between 1 and 5 km from the sea." - Hot Dip Galvanisers Association SA - SA Roofing Magazine, March 2009.*

Are you getting what you paid for? There are certain grades of pre-painted galvanised steel roofing materials that are being incorrectly used at the coast - directly against the manufacturers' own guidelines.

For a pre-painted steel roof that keeps its colour and lasts 4x longer in our harsh coastal & industrial conditions, insist on Clean COLORBOND™ steel.

Guidelines	Distance to Sea		
	100-400m	401-1000m	1-5 km
Prepainted Galvanised Z200	Not recommended	Not recommended	Not recommended
Prepainted Galvanised Z275	Not recommended	Not recommended	Recommended
Clean COLORBOND™ AZ150	Not recommended	Recommended	Recommended
Clean COLORBOND™ AZ200 ULTRA	Recommended	Recommended	Recommended

**Building or replacing a roof near the coast? Use Clean COLORBOND™.**

**Available from reputable suppliers across South Africa.**

*clean*

**Colorbond™**

*Long lasting beauty*
